CAREER OBJECTIVE

B.Tech CSE (Artificial Intelligence & Machine Learning) graduate (2025) with hands-on ERPNext/Frappe implementation experience — building the DocTypes, workflows, and reports that map directly to real business processes across order management and inventory. Comfortable gathering requirements from stakeholders, documenting process flows, and translating them into technical specifications for a development team. Looking to bring that combined functional-and-technical grounding in ERPNext to a Functional Consultant – ERP role.

RELEVANT EXPERIENCE

Functional Consultant — ThinkCampus Pvt Ltd

August 2023 – Present

- Worked directly on ERPNext's Inventory and Order Management modules — building custom DocTypes, server scripts, and reports that mirror real order-processing, inventory, and reporting workflows.
- Collaborated with cross-functional stakeholders to gather requirements, document business workflows, and translate them into technical specifications for implementation.
- Coordinated with the development side of ERPNext customizations end-to-end — from requirement to DocType design, server scripts, and REST APIs — giving visibility into both the functional and technical halves of an ERP rollout.
- Documented workflows and troubleshooting guides for internal teams, improving process clarity and team self-sufficiency.
- Designed role-based access control (RBAC) to separate secure internal workflows from public-facing operations, reflecting real organizational process boundaries.

RELEVANT PROJECT

Enterprise E-Commerce Platform — Frappe Framework (Order Management & Inventory)

- Engineered a scalable e-commerce ecosystem on the Frappe Framework covering product discovery, merchandising, and schemas for complex multi-variant inventory — the same Inventory/Order Management process area this role's reporting and process-flow work centers on.
- Architected role-based access control (RBAC) with custom authorization middleware, separating secure internal workflows from public-facing operations at scale.

Real-Time Production Monitoring & Smart Manufacturing Management System — Frappe ERPNext

- Built live production tracking across Work Orders, Job Cards, and Operations using ERPNext's Manufacturing module (BOM, Work Order, Job Card) with real-time updates via Frappe's frappe.realtime/websocket events, giving supervisors shop-floor progress the moment an operator logs it.
- Automated material and inventory sync tied to Work Orders using Stock Entry (Material Transfer for Manufacture), keeping raw material availability, WIP warehouse levels, and finished goods updated instantly without manual reconciliation.

- Developed live dashboards and automated alerts (custom Dashboard/Chart and Desk pages) surfacing machine/operator utilization, delayed job cards, and quality rejections, with instant notifications when a job exceeded expected time or failed quality checks.

EDUCATION

B.Tech, CSE (Artificial Intelligence & Machine Learning)

2021 – 2025

CMR College of Engineering and Technology · CGPA 7.07

B.Tech Minor, CSE (Cyber Security)

2023 – 2025

CMR College of Engineering and Technology · CGPA 8.03

Intermediate (MPC)

2019 – 2021

Sri Amogha Junior College · 82.6%

SKILLS

ERP/Functional: ERPNext (Inventory, Order Management), Business Process Documentation, Requirements Gathering, Process Flows

ERP/Technical: Frappe Framework (DocTypes, Server Scripts, REST APIs, RBAC), Custom Authorization Middleware, Multi-Variant Inventory Schema Design, Product Discovery & Merchandising

Programming: Python, JavaScript, Java, C, C++, SQL, HTML, CSS

Backend: FastAPI, Flask, Docker, AWS, Apache Kafka, PostgreSQL/MySQL

Practices & Tools: Agile, SDLC, Documentation, Git, VS Code

Soft Skills: Stakeholder Communication, Cross-Functional Coordination, Problem-Solving, Time Management

CERTIFICATIONS

- ERPNext Completion Certificate — MaxMunus
- Python Certification — CISCO
- Certified AI Associate — Salesforce
- Cybersecurity Fundamentals Associate — Zscaler
- Google Analytics Certification
- Claude (Anthropic) Certificate

ACTIVITIES

- Organized UI & logo design competition; participated in inter-college football tournaments and athletics.
- Completed French language classes; active in team/community engagement (Street Cause).
